

FAR Part 77 Airspace

The Airport's FAR Part 77 airspace extends over areas of Marion and Clackamas Counties, and the Cities of Aurora, Wilsonville, and Barlow.

Each of these jurisdictions are responsible for protecting the areas of airport airspace that fall within their boundaries and most employ overlay zoning districts as a mechanism to do so.

For Aurora State Airport, the approach surfaces for the runway extend 10,000 feet beyond each runway (beginning 200 beyond the runway end).
