You don't often get email from harmonjan@sterling.net. [Learn why this is important](#)

We are writing to express our strong objection to lengthening runways and increasing size of aircraft at Aurora Airport. Planes from this airport already take off and land over densely populated areas and this proposal will seriously adversely affect communities in and near the flight path both in terms of noise and quality of life, and also in terms of safety. In addition, the Boone Bridge section of I-5 is already a traffic nightmare and adding traffic to and from the airport will necessitate a new bridge before any expansion is even considered. We have a more than adequate airport in Portland and the studies do not support the need for this expansion at this time.

Please take citizens and neighbors concerns into consideration and stop any expansion of Aurora Airport.
Thank you,
Harmon and Janette Laurin
Wilsonville, Oregon
