 **Aurora State Airport Master Plan Website Comments**

Name Ted Davis

Organization Hangar Owner and Columbia Aviation Association Member

Comments or questions? There is a significant shortage of hangars. The hangars sited for destruction are all currently providing significant employment and economic revenue. The two motivations for the proposed destruction that are unnecessary and could be better solved by: 1) a vehicle lane would work MUCH better as far as possible away from the taxiway without talking 2) The parallel taxi-lane is unnecessary, and very similar results could be achieved with ODAV purchasing only 1 acre from a willing seller. By unilaterally taking the private hangars would cause long term undue economic harm the hangar owners and businesses that occupy them due to the

fact that there is NO viable options to relocate at the Aurora Airport due to lack of available hangar space as referenced above.

I recommend airport safety improvements but only with no destruction of any hangars.

I would like to receive email updates.
