Dear all,

This email is regarding the Aurora airport master plan that is stating to remove hanger in order to accommodate another taxi way.

For your information there is a significant shortage of hangers. I have been trying to find a hanger for the last two years to no avail. The hangers waiting list at each airport to include Aurora airport is miles long. It would be incomprehensible to remove any hangers for the purpose of building another taxiway. There is no need to build an additional taxiway as there is no taxiway traffic issues whatsoever.

But there is definitely an impact to the owners and renters of those hangers which include established businesses.

There is absolutely zero purpose of taking this route.

I am more than positive that FAA would consider any exemptions if they were requested should FAA compliance be a cornerstone of this proposal.

Please feel free to contact me with any questions or clarifications.

Regars,
Karina Mayner
